

DE GRUYTER

*Call for Authors*

**Applications of Mathematics in Engineering and Information Sciences**

**A BOOK SERIES FROM WALTER DE GRUYTER, GERMANY**

**Series Editor: Mangey Ram**

The hot areas (but not limited to) for this new series are:

- Advanced Mechatronics and Robotics
- Applied Mathematical Problems
- Applied Mathematics
- Applied Probability
- Applied Statistics Applications
- Approximation Theory
- Artificial Intelligence
- Assurance Techniques for Service-Oriented Systems
- Automotive Systems
- Computational Mathematics
- Decision Science
- Differential Equations
- Discrete Mathematics and Computation
- Fault Diagnosis and Fault Tolerance
- Finite Element Methods
- Fluid Dynamics
- Fuzzy and Possibility Theory
- Fuzzy Logic Applications
- Genetic Algorithm
- Heat and Mass Transfer
- Industrial Automation
- Intelligent Control Systems
- Machine Learning
- Maintenance Analysis
- Mathematical Biology
- Mathematical Economics
- Mathematical Modeling
- Mathematical Problems
- Mathematical Tools & Techniques
- Neural Computing
- Neural Network
- Numerical Methods
- Operations Research
- Optimization and Algorithms
- Queuing Systems
- Reliability Modelling
- Risk Analysis
- Safety Analysis
- Simulation
- Soft Computing
- Statistical Inference
- Stochastic Modelling
- Supply Chain Management
- Sustainable Management and Engineering

**PROPOSALS MAY BE SUBMITTED TO:**

**Dr. Mangey Ram**

Professor

Department of Mathematics; Computer Science and Engineering

Graphic Era Deemed to be University, Dehradun, INDIA.

E-mail: drmrswami@yahoo.com
